

Ute Besenecker is a design researcher and educator with a focus on the impact of lighting on human perception, behavior, and wellbeing in spatial environments.

Ute holds a Ph.D. in Architectural Sciences from Rensselaer Polytechnic Institute, along with master's degrees in Lighting and Architecture and Design from top institutions in the USA, Germany, and Italy.

Her current academic endeavors at KTH involve teaching and supervising in architecture and lighting design programs and conducting grant-funded research in indoor and outdoor lighting. Ute is an Associate Editor for LEUKOS, the journal of the Illuminating Engineering Society, and active in several professional organizations including IALD, CIE, and IES.
